

MSPE 6/4/2.43

TECHNICAL DETAILS

-  **Manufacturer: Cometto**
-  **Model: MSPE 6/4/2.43**
-  **Year of construction: 2022**
-  **Power: 110, 202 or 368 kW**
-  **Weight: 24.000kg p**

CAPACITY

-  **Max. axle load: 48t**

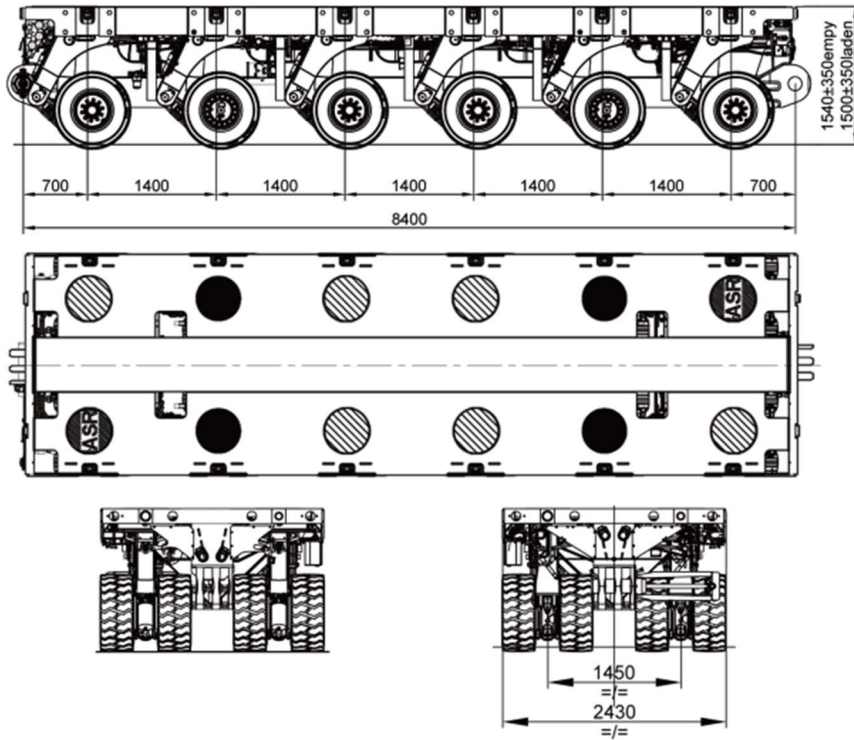

OPTIONAL

-  **Additional axle lines & machinery**
-  **PPU with 110, 202 or 368 kW**
-  **Suitable load spreading**
-  **High level expertise**
-  **Related engineering calculations**

CONTACT

Please consult the Q3 Group operations department for more details:

CAPABILITY

The MSPE 6/4/2.43 has a maximum axle load of 48t and a suspension stroke of 700mm with a minimum height of +- 1150mm. Together with its all terrain tires and our expertise, the SPMT can perform in all situations imaginable.

MODULAR

Our SPMT, also referred as Self Propelled Modular Transporter, is able to connect to additional axle lines. By adding more axle lines and/or PPU's to the convoy, the capacity of the convoy increases significantly. This makes a SPMT a very adaptable piece of equipment.

POWER

We offer 3 different size PPU's, being the 110, 202 and the 368kW. Our engineering department together with our operations department is able to configure the optimal convoy with suitable PPU to get the job done.

EXPERTISE

Q3 offers 15+ years of experience with SPMT related operations, making sure we are the best partner for your logistical challenge.

FLEET

Q3 offers multiple other pieces of machinery & equipment as mobile cranes, trucks, trailers, load spreading, supports & tools. This makes Q3 a partner for the total work package.
