Figure 1, low loader trailer with Q3 Group container

LOW LOADER

The Q3 low loader is a BROSHUIS 3ABSB-48 SL/1. A low loader is a semi-trailer where the loading floor is located between the gooseneck and the axle bogey. It is able to transport high loads because the loading floor is very close to the ground. The trailer weighs 17t and together with our Volvo FH 500 it is able to transport 23t.

FLATBED

The Q3 flatbed is a NOOTEBOOM OVB-48-03V. A flatbed trailer is a typical open deck unit without a roof or side panels. It is mainly used for transporting heavy, oversized, wide and fragile items such as machinery, building materials and equipment. The flatbed makes loading and unloading cargo much easier. The trailer weighs 12t and together with our Volvo FH 500 it is able to transport 28t.
